

SmarterFit

Smarter online sizing. Scan. Fit. Done.
Scan once. Get your Fit Passport for every brand.

Founder: Jayme Gardner. Melbourne, Australia.
Patent filed. Trademark registered, (AU)

Currently selecting 3 launch partners for early access.

Problem

Sizing is the #1 driver of returns in online fashion.

- . Up to 40% of online fashion orders are returned due to fit and size, not defects.
- . Shoppers “bracket buy” - ordering multiple sizes and returning most.
- . Returns cost the fashion industry 700billion dollars globally every year in shipping, processing and wasted inventory.
- . The experience of online shopping is broken: guessing, frustration, low confidence.

The industry needs accuracy, not more size charts.

Solution

Scan once. Get your Fit Passport or every brand.

- A **5-second phone scan** creates a precise body profile
- SmarterFit generates a **Fit Passport** that works across brands
- Shoppers instantly see **their correct size** before buying
- No more guessing, no more multiple returns

One scan. Every brand. Perfect fit.

How SmarterFit Works

1. Scan Your Body

Advanced capture tech maps your shape in under 5 seconds

2. Your Fit Passport

A universal profile that works across brands, instantly

3. Perfect Fit, Every Time

Personalized sizing matched to real garment dimensions

Market Opportunity

Massive problem. Massive upside.

- . Global online fashion market: **\$Xbn**
- . Majority of returns tied to **fit and sizing**
- . Even a **small reduction** in returns unlocks huge savings
- . SmarterFit becomes the **sizing layer** of global e-commerce

Competitive Landscape

Where SmarterFit wins

- . **Consumer-first + scan-based**
- . **Reusable Fit Passport across brands**
- . **Not a PLM module or single-brand widget**

SmarterFit is the only platform designed to travel with the shopper.

Product Status

- . Landing page + **scan demo** live
- . **AU patent & trademark** filed
- . MVP scoped: **scan** → **size recommendation** → **Fit Passport**
- . Preparing global patent filing
- . Targeting **pilot with 1–3 AU brands**

We're moving fast — and focused.

Business Model

B2B2C SaaS - Brands pay, shoppers don't

Monthly platform fee + usage-based pricing

- . Value delivered
- . Fewer returns
- . Higher conversion
- . Better inventory accuracy
- . New fit/size insights

SmarterFit makes every order more profitable

Go-To-Market

Start narrow, scale wide

- . Phase 1 — AU/NZ DTC brands**

Activewear, swim, basics (high return categories)

- . Phase 2 — Platform integrations**

Shopify, BigCommerce, WooCommerce

- . Phase 3 — Global expansion + partnerships**

We become default sizing infrastructure — not a feature.

Moat & IP

- . **Patent filed in AU** — extending globally
- . **Brand-agnostic Fit Passport**
- . One scan reused across **multiple retailers**
- . Anonymised body + fit data improves accuracy over time

Every scan makes SmarterFit smarter

The Ask/Next step

Now seeking

1–3 launch partners for 30–60 day pilots

Introductions to fashion/e-commerce leaders

Advisors in AI, sizing, retail, and logistics

Let ends size guessing for good.

Scan. Fit. Done.

Why Now

- Online fashion continues to surge
- Returns are crushing margins and sustainability targets
- Consumers are comfortable with **phone-based body tech**
- Brands need **accuracy + confidence**, not more size charts
- Mobile body-scanning is the **fastest-growing segment** in fit-tech

The timing is perfect — the infrastructure hasn't been built yet.
